

**BUILDING HEIGHTS:**

The maximum height of booth construction depends on your booth size:

<b>6-10 sqm</b> non-island, inline/end of row /corner and peninsular booths with back and side walls	The <b>maximum height of booth construction is 2.50 m.</b> Hanging signs are not permitted.
<b>12-18 sqm</b> non-island booths, peninsular booths, with back and side walls	The <b>maximum height of booth construction is 2.50 m</b> at the back wall. With a minimum distance of at least 2m towards the back wall, a maximum height of 3 m is permitted. Otherwise extended heights and hanging signs are not permitted.
<b>20 sqm</b> and larger island booths only	The <b>maximum height of booth construction is 4.50 m.</b> The <b>maximum height for hanging signs is 7 m</b> (highest point).

**SPACE ONLY BOOTHS – INDIVIDUAL BOOTH DESIGN:**

To create an open environment for the exhibition, please note that **only 1/2 of any side of a booth bordering an aisle may be enclosed.**

If you plan a customized booth design, you require a **2-step approval:**

**1. DESIGN APPROVAL:**

Designs must be approved by **February 15th** by EBD Group. Please send the drawings, incl. measurements to your exhibitor contact.

**2. AUSTRIAN STRUCTURAL ENGINEER:**

Individual booth constructions in Austria will need a safety inspection and require an independent approval by an Austrian structural engineer. Please check the document **“Structures Requiring Acceptance by a Structural Engineer”** which is linked on our website.

Please contact Thomas M.I. Hanreich or Markus Müll at [office@zt-menzl.at](mailto:office@zt-menzl.at) regarding necessary checks and approvals.
